GOOD CLINICAL PRACTICE

How to write the research protocol for a successful project.

At the occasion of the International Clinical Trials day celebrated around the world for the anniversary of the first trial conducted by James Lind on 20th May 1747, CIEC has partnered up with CHL in order to organize an interactive and certified training in “Good Clinical Practice”, focussing on the writing of a protocol.

Course Content

The protocol is the most important document of a clinical research project and the key of the success of your research project.

This course will teach you how to write a protocol and will give you all the basic elements according to good Clinical Practice to write a protocol in the respect of ethical rules and participant protection.

After successful completion of a test at the end of the training, the participants will obtain a certificate that will document their knowledge of GCP.
